This Report is not a guarantee, valuation or appraisal. This Report contains only the characteristics of the diamond described herein after it has been graded, tested, examined and analyzed by GIA Gem Trade Laboratory under 10X magnification, and/or has been recorded using the techniques and equipment available to GIA Gem Trade Laboratory at the time of the examination and/or at the time of being recorded, including fully corrected 90X scope and binocular microscope, master color comparison standards, standardized viewing environment and light source, electronic carat balance, synthetic diamond screening device, high intensity short wave fluorescence imaging system, short wave ultraviolet transmission detection system, optical measuring device, extra large expanding device, ProportionScope™, ultraviolet lamp, millimeter gauge, and auxiliary instruments as necessary. Red symbols denote internal characteristics (inclusions), lines or black symbols denote external characteristics (blemishes). Diagram is an approximate representation of the diamond, and symbols shown indicate type, position, and approximate size of clarity characteristics. All clarity characteristics may not be shown. Details of level are not shown. The recipient of this Report may wish to consult a qualified Jeweler or Grader for advice about the importance and interrelationship of cut, color, clarity and carat weight.
